

PSE 43_ with stepping motor

Positioning of auxiliary and positioning axes

Special features

- complete solution including motor, gear, controller, absolute measuring system and bus interface
- easy mounting due to hollow shaft, manual positioning also possible
- quickly recoups automation costs by considerably reducing setup time
- eliminates the need for reference runs
- address may be set using the BUS or a manual decade switch
- mechanical display of actual position
- optional hand brake for raising holding torque

Technical data

nominal power output	24 W
start-up duration	30 % (basis time 300 s)
supply voltage	24 VDC ± 10 % galvanic separation between control unit and motor
nominal current	3 A
power consumption (control unit)	0.1 A
positioning accuracy position data are acquired directly at the output shaft	0.9 °
positioning range	80 rotations
shock resistance as stipulated in DIN IEC 68-2-27	50 g 11 ms
resistance to vibration as stipulated in DIN IEC 68-2-6	10...55 Hz 1.5 mm / 55...1000 Hz 10 g / 10...2000 Hz 5 g
testing	CE
output shaft	14 H 7 hollow shaft with adjustable collar
maximum axial thrust	20 N
maximum radial force	40 N
ambient temperature	0...45 °C
storage temperature	-10...70 °C
protection class	IP 54
weight	1900 g

nominal power	nominal torque	self-holding torque	nominal rated speed	A model
24 W	10 Nm	10 Nm	22 min ⁻¹	4310
24 W	25 Nm	25 Nm	9 min ⁻¹	4325

data interface	B
CANopen / DS 301	C
Profibus DP (switchable bus terminator)	DP

instrument connections	C
Standard CANopen (round socket for power supply and bus)	S
Standard Profibus DP (round socket for power supply and D-Sub for bus)	D
Round sockets for Profibus DP (power supply and bus)	R

optional hand brake	D
no brake	O
with brake (holding torque is equivalent to nominal torque)	M
